🍳 Provider Dashboard – Functional Requirement Document (FRD)

Introduction

Provider Dashboard **mess / tiffin provider** ke liye ek central system hai jahan se wo **orders, menu, earnings, customers aur settings** manage karega. Abhi dashboard basic hai, is document ka goal hai **complete professional-level provider dashboard** define karna.

🍴 Objectives

- Provider ko **real-time orders** manage karne ka control dena
- Daily **menu publish & edit** easily karwana
- **Earnings, payouts aur analytics** clear dikhana
- Customers ke saath **better coordination & feedback handling**
- Manual kaam kam karke **automation & speed** badhana

🌶️ 1. Dashboard (Home)

Status: ❌ Incomplete

🎂 Critical Features

- **Today's Summary Cards**
- Active Orders
- Today’s Earnings
- Pending Deliveries

- Average Rating

- **Live Order Status**

- Order flow: Preparing → Ready → Dispatched → Delivered

- Real-time status update

- **Today's Menu Status**

- Lunch / Dinner publish status
- Quick edit & republish option

🥭 Important Features

- **Quick Actions Panel**
- Start Preparation
- Mark Ready
- View All Orders
- **Earnings Overview Chart**
- Weekly / Monthly earnings graph

🍩 Nice to Have

- **Customer Feedback Widget**
- Recent reviews
- Average rating display

---

2. Orders Management

Status: ❌ Needs Development

🎂 Critical Features

- **Live Orders Panel**
- Incoming orders
- Accept / Reject option
- **KDS (Kitchen Display System)**
- Kitchen-style order queue
- Clear item & quantity view

🥭 Important Features

- **Order History**
- Past orders
- Filters (date, status)
- **Delivery Assignment**
- Assign order to delivery partner

🍽️ 3. Menu Management

Status: ⚠️ Partial

🎂 Critical Features

- **Daily Menu Publish**
- Separate Lunch & Dinner menu
- Daily mandatory publish
- **Item Management**
- Add / Edit / Delete food items

🥭 Important Features

- **Menu Templates**
- Save weekly / recurring menus
- Reuse anytime

🍩 Nice to Have

- **Special Items / Add-ons**
- Guest meals
- Extra roti / sabzi

🍋 4. Analytics & Reports

🎂 Critical Features

- **Earnings Report**
- Daily / Weekly / Monthly breakdown

🥭 Important Features

- **Order Analytics**
- Peak order hours
- Most popular items

🍩 Nice to Have

- **Customer Insights**
- Active subscribers
- Retention & churn rate

---

5. Finance & Wallet

🎂 Critical Features

- **Wallet Balance**
- Total earnings
- Pending payout
- **Payout History**
- All payouts
- Status (Pending / Completed)
- **Request Payout**
- Withdraw earnings to bank

🥭 Important Features

- **Invoice Download**
- Admin commission invoices

---

6. Customer Management

🎂 Critical Features

- **Active Subscribers List**
- All current customers

🥭 Important Features

- **Customer Profiles**
- Address
- Food preferences
- Allergies (if any)
- **Feedback / Reviews**
- View reviews
- Reply option

---

7. Profile & Settings

🎂 Critical Features

- **Store Profile**
- Mess name
- Address
- Photos
- **Bank Details**
- Account details for payouts

🥭 Important Features

- **Operating Hours**
- Lunch & Dinner timings

🍩 Nice to Have

- **Delivery Settings**
- Delivery radius
- Delivery modes

🍋 Overall Completion Status

Section	Completion	Action Needed
Customer	🟢 95%	Minor polishing
Admin	🟢 90%	Minor enhancements
Provider	🔴 20%	Major development needed

Provider → Customer Module – Detailed Analysis & Roadmap

This section covers **Provider dashboard ke andar Customer-related complete scope**, including current status, missing features, issues, aur phase-wise TODO planning.

🍋 Current Implementation Status

Area	Backend API	Frontend UI	Status
Active Customers List	✅ getSubscribers()	✅ ActiveCustomerList.jsx	🟡 60%
Customer Feedback / Reviews	✅ reviewTriageController.js	✅ CustomerFeedback.jsx	🟡 70%
Dashboard Stats	✅ activeSubscribers count	✅ ProviderStatsCards.jsx	🟡 50%
Today's Orders (Customer Info)	✅ getTodaysOrders()	✅ ProviderRecentOrders.jsx	🟡 60%
Subscription Management	✅ pauseSubscription / resumeSubscription	❌ UI Missing	🔴 30%
Cancel Order + Refund	✅ cancelOrderByProvider()	❌ UI Missing	🔴 20%

🎂 Missing – Mandatory Features (No Compromise)

🍲 Customer Profile Detail View

Feature	Backend Need	Frontend Need	Priority
View Address	❌ API expand	❌ CustomerProfileModal	🔴 Critical
Dietary Preferences	❌ Customization API	❌ Preferences UI	🔴 Critical
Allergies	❌ Allergy API	❌ Tags UI	🔴 Critical
Subscription History	❌ API	❌ UI	🟡 Important
Order History (Provider-wise)	❌ API	❌ UI	🟡 Important

🧻 Subscription Actions (Provider Side)

Feature	Backend	Frontend	Priority
Pause Subscription	✅	❌ Button + Modal	🔴
Resume Subscription	✅	❌ Button + Modal	🔴
Extend Subscription	❌	❌	🟡

Feature	Backend	Frontend	Priority
Renewal Reminder	❌	❌	🟢
Expiring Subscriptions View	✅	❌ Dedicated UI	🔴

🫘 Order Management with Customer Context

Feature	Backend	Frontend	Priority
Customer Address on Order	✅	❌ Proper Display	🔴
Customer Phone	✅	✅	✅
Cancel Order + Refund	✅	❌ Cancel Modal	🔴
Call / WhatsApp	❌	❌ Buttons	🔴
Special Instructions	❌	❌	🟡
Customizations on Order	❌	❌	🔴

🫚 Customer Communication

Feature	Backend	Frontend	Priority
Send Notification	❌	❌	🟡
Reply to Feedback	✅	⚠️ Not Connected	🔴
Bulk Message	❌	❌	🟢

☕ Customer Analytics

Feature	Backend	Frontend	Priority
Retention Rate	❌	❌	🟡
New vs Returning	❌	❌	🟡
Top Customers	❌	❌	🟢
Preference Distribution	❌	❌	🟢

Issues in Existing Code

File	Issue	Fix Needed
ActiveCustomerList.jsx	Dummy fallback data	Remove, show error state
ActiveCustomerList.jsx	View Profile not working	Connect modal
ActiveCustomerList.jsx	Contact button inactive	Add Call / WhatsApp
FeedbackCards.jsx	Reply not hitting API	Connect handleReply
providerDashboardController.js	req.user.id vs _id	Standardize _id
providerSubscriptionController.js	APIs exist, no UI	Add buttons

---

Phase-wise TODO Plan

Phase 1 – Critical (Must Have)

- Customer Detail Modal (profile + preferences + allergies)
- Pause / Resume Subscription UI
- Order → Customer full visibility
- Cancel Order with refund modal
- Call / WhatsApp integration
- Feedback reply API integration

Phase 2 – Important (Should Have)

- Expiring subscription widget
- Customer order history modal
- Analytics charts (growth, retention)

🥗 Phase 3 – Nice to Have

- Bulk messaging
- Loyalty points & leaderboard
- Birthday / occasion reminders

🍉 Overall Progress

Category	Completed	Missing	Total
Customer List	4	3	7
Subscription Actions	2	4	6

Category	Completed	Missing	Total
Order-Customer Link	2	5	7
Feedback & Communication	2	3	5
Analytics	1	4	5
Total	**11**	**19**	**30**

Completion: 37%
Remaining Work: 63%

🧄 Final Note

Ye document **Provider → Customer module ka master blueprint** hai. Isko follow karke: - Provider experience strong hoga - Customer complaints kam hongi - Support & refund issues clear honge - System enterprise-level lagega

♍ Recommended: Phase 1 ko pehle 100% complete karo, bina shortcut.
